CS4433 – Moderated Learning Management System

User Manuals

Version: 1.0

PART A: STUDENT USER MANUAL

1. Introduction

The Student section of the Moderated Learning Management System allows students to access courses, enroll in courses, view assignments, submit academic work and view released results.

2. Logging In

1. Launch the Moderated LMS application.
2. Select the login option.
3. Enter your registered login credentials.
4. Submit your details.
5. After successful authentication, the Student menu is displayed.

If login fails, check your credentials and try again.

3. Viewing Available Courses

Students can view courses that are available for enrolment.

Steps:

1. Select the option for viewing available courses.
2. Review the displayed course information.
3. Identify the course you want to enroll in.

Course information includes the course ID, course code and course name.

4. Enrolling in a Course

To enroll in a course:

1. Select the enrolment option.
2. View the available courses.
3. Enter the course ID.

4. Confirm your selection.
5. Check the system response.

The system will display a confirmation message if enrolment is successful.

You cannot enroll in a course that is not available to you or in which you are already enrolled.

5. Viewing Enrolled Courses

To view your enrolled courses:

1. Select the option for viewing enrolled courses.
2. The system displays the courses associated with your account.
3. Review the course information.

6. Viewing Assignments

Students can view assignments associated with their enrolled courses.

Steps:

1. Select the assignment viewing option.
2. View the available assignments.
3. Review the assignment details.

Assignment information may include:

- Assignment ID
- Assignment title
- Description
- Due date
- Maximum mark

Pay attention to the due date before submitting your work.

7. Submitting an Assignment

To submit an assignment:

1. Select the assignment submission option.
2. Identify the assignment.

3. Enter the required file path.
4. Confirm the submission.
5. Check the confirmation message.

Ensure that the file exists at the specified location.

The application records the submission information in the database.

8. Viewing Submission Status

To view your submissions:

1. Select the submission viewing option.
2. Review the displayed submission information.
3. Check the status of each submission.

9. Viewing Released Results

Students can access marks and feedback after results have been released.

Steps:

1. Select the results viewing option.
2. Review the released marks.
3. Read the lecturer's feedback.

Results that have not been released are not yet available for student viewing.

10. Logging Out

Select the logout option when you have finished using the system.

Always log out after completing your activities.

PART B: LECTURER USER MANUAL

1. Introduction

The Lecturer section allows lecturers to manage assignments, review student submissions, award marks, provide feedback and grant individual assignment extensions.

2. Logging In

1. Launch the LMS.

2. Select the login option.
3. Enter your lecturer credentials.
4. Submit your details.
5. The Lecturer menu appears after successful authentication.

3. Viewing Department Courses

Lecturers can view courses associated with their department.

Steps:

1. Select the course viewing option.
2. Review the displayed courses.
3. Identify the course for which you want to manage assignments.

4. Creating an Assignment

To create an assignment:

1. Select the create assignment option.
2. Enter the course ID.
3. Enter the assignment title.
4. Enter the assignment description.
5. Enter the due date.
6. Enter the maximum mark.
7. Confirm the operation.

The system stores the assignment information in the database.

Ensure that the assignment information and deadline are correct before confirming.

5. Viewing Student Submissions

Lecturers can view submissions associated with their department's courses.

Steps:

1. Select the submission viewing option.
2. Review the displayed submissions.

3. Identify the submission that needs to be graded.

Submission information includes relevant assignment and student details.

6. Grading a Submission

To grade a student submission:

1. Select the grading option.
2. Identify the submission.
3. Review the submission details.
4. Enter the awarded mark.
5. Provide feedback.
6. Confirm the grading operation.

The system records the mark and feedback.

The mark must be within the permitted range for the assignment.

After successful grading, the submission status changes to Graded.

7. Granting an Individual Extension

Lecturers can grant individual students additional time to complete an assignment.

Steps:

1. Select the individual extension option.
2. Identify the student.
3. Identify the assignment.
4. Enter the revised deadline.
5. Provide a reason for granting the extension.
6. Confirm the operation.

The system records the extension details.

The extension applies to the specified student and assignment.

8. Late Submission Penalties

The LMS applies the graduated late penalty policy when calculating marks.

Submission time	Penalty
On or before deadline	0%
1 day late	10% of maximum mark
2 days late	20% of maximum mark
3 days late	30% of maximum mark
More than 3 days late	Final mark is 0

Lecturers should review the submission details and applicable deadline before grading.

9. Feedback

Lecturers should provide feedback when grading assignments.

Feedback should:

- Explain the student's performance.
- Identify areas that require improvement.
- Be relevant to the submitted work.
- Be clear and understandable.

10. Logging Out

Select the logout option to end your session.

PART C: HEAD OF DEPARTMENT USER MANUAL

1. Introduction

The Head of Department (HOD) section provides functionality for reviewing and moderating marks awarded by lecturers.

The HOD ensures that marks are reviewed before being released to students.

2. Logging In

1. Launch the LMS.
2. Select the login option.
3. Enter your HOD credentials.
4. Submit your details.

5. The HOD menu appears after successful authentication.

3. Viewing Department Submissions

The HOD can review submissions associated with the department.

Steps:

1. Select the relevant submission viewing option.
2. Review the displayed submissions.
3. Identify submissions awaiting moderation.

4. Reviewing a Graded Submission

Before moderating a mark:

1. Identify the submission.
2. Review the assignment information.
3. Examine the lecturer's awarded mark.
4. Review the lecturer's feedback.
5. Decide whether the mark should remain unchanged or be adjusted.

The HOD should ensure that the mark is reasonable and supported by the assessment.

5. Moderating Marks

To moderate a submission:

1. Select the moderation option.
2. Identify the relevant submission.
3. Review the lecturer's mark.
4. Enter the moderated mark if an adjustment is necessary.
5. Record the reason for the adjustment.
6. Confirm the operation.

The system records the moderation information.

The submission status changes to Moderated after successful moderation.

6. Changing a Submission Mark

Where a mark requires adjustment:

1. Select the mark adjustment option.
2. Identify the submission.
3. Enter the revised mark.
4. Provide a reason for changing the mark.
5. Confirm the operation.

The system records the mark change and its associated reason.

7. Releasing Results

After moderation, the HOD can release results to students.

Steps:

1. Select the result release option.
2. Identify the moderated submission.
3. Review the final mark.
4. Confirm the release operation.

After successful release, the submission status changes to Released.

Students can then access their results and feedback.

8. Important Responsibilities

The HOD should:

- Review lecturer-awarded marks carefully.
- Ensure that mark adjustments have valid reasons.
- Confirm that moderation is completed before releasing results.
- Maintain the integrity of academic results.
- Ensure that results are released only after the required review.

9. Logging Out

Select the logout option to end your session.

PART D: ADMINISTRATOR USER MANUAL

1. Introduction

The Administrator section provides functionality for managing users, departments and courses within the Moderated LMS.

Administrators are responsible for maintaining the academic structure and user accounts within the system.

2. Logging In

1. Launch the LMS.
2. Select the login option.
3. Enter your administrator credentials.
4. Submit your details.
5. The Administrator menu appears after successful authentication.

3. Viewing Registered Users

Administrators can view registered users.

Steps:

1. Select the user management option.
2. Choose the option to view users.
3. Review the displayed account information.

The system supports the following user roles:

- Student
- Lecturer
- Head of Department
- Administrator

4. Creating a Student Account

To create a Student account:

1. Select the Student account creation option.
2. Enter the required student information.
3. Enter the login details.

4. Confirm the operation.
5. Check the confirmation message.

The account is stored in the database after successful creation.

5. Creating a Lecturer Account

To create a Lecturer account:

1. Select the Lecturer account creation option.
2. Enter the required lecturer information.
3. Select the appropriate department.
4. Enter the login credentials.
5. Confirm the operation.

The lecturer account is associated with the selected department.

6. Creating a Head of Department Account

To create an HOD account:

1. Select the HOD account creation option.
2. Enter the required information.
3. Associate the HOD with the appropriate department.
4. Enter the login credentials.
5. Confirm the operation.

The account is created after successful validation.

7. Creating an Administrator Account

To create another Administrator account:

1. Select the Administrator account creation option.
2. Enter the required account information.
3. Provide the login credentials.
4. Confirm the operation.

Administrator accounts should only be created for authorized personnel.

8. Managing Departments

Administrators can view and add academic departments.

Viewing Departments

1. Select the department management option.
2. Choose the department viewing option.
3. Review the existing departments.

Adding a Department

1. Select the add department option.
2. Enter the department information.
3. Confirm the operation.
4. Check the confirmation message.

9. Managing Courses

Administrators can view and add courses.

Viewing Courses

1. Select the course management option.
2. Choose the course viewing option.
3. Review the existing courses.

Adding a Course

1. Select the add course option.
2. Enter the course code.
3. Enter the course name.
4. Select the associated department.
5. Confirm the operation.

The course is stored in the database after successful creation.

10. Assigning Lecturers to Courses

Where lecturer-course assignment functionality is available:

1. Select the lecturer-course management option.
2. Identify the lecturer.
3. Identify the course.
4. Confirm the assignment.

The lecturer can then access the relevant course functionality according to the system's access rules.

11. Student Enrolment

Administrators should use the available enrolment management functionality where provided.

Students can also enroll themselves through their own accounts using the course enrolment option.

12. Security Responsibilities

Administrators should:

- Protect administrator login credentials.
- Create accounts only for authorized users.
- Ensure that user details are entered correctly.
- Avoid sharing passwords.
- Restrict access to the database.
- Maintain accurate department and course information.

13. Logging Out

Select the logout option to end your session.
